EXPERIENCE / EDUCATION

Software Development Mentorship

JAN 2022 - JUN 2022

Through this private mentorship, I have gained the experience of building multiple web sites and apps using various frontend frameworks and 3rd party libraries. I have now developed a passion for software development and am highly motivated to progress my career in this field.

PROJECTS

Personal Portfolio Site

Nuxt.js, Vue, HTML, CSS/Sass, JS

This is my personal portfolio site that features all of my projects and contact information. It is built with Vue using Nuxt.js.

Game of Thrones Wiki

React, Bootstrap, HTML, CSS, JS

This is a dynamic wiki page that uses a public Game of Thrones API for its backend. It is a React SPA built using React hooks and Bootstrap.

Expense Tracker App

Vue, HTML, CSS/Sass, JS, Firebase

This is a responsive Vue SPA that uses Firebase Firestore to keep track of a list of user expenses and calculate a running total.

To-Do List App

HTML, CSS/Sass, JS

This is a responsive to-do list app made with plain JavaScript. The app's data is persistent for the user by saving it to localStorage.

Milky Way Marketing Website

HTML, CSS/Sass

This is a multi-page static site featuring various unique page layouts, multiple contact forms, and is responsive across all screen sizes.

SKILLS

Web Development

Graphic Design

Refactoring

Debugging

Context Switching

Time Management
